

A GLOBAL NETWORK FOR GOOD

From strengthening local resilience to advancing health, youth opportunity, and financial security—wherever there’s a need in our communities, United Way is there. We’re mobilizing communities to action, bringing millions of volunteers, advocates and donors together to make life better for people around the world.

YOUTH OPPORTUNITY

We’re helping young people realize their potential from cradle to career by improving childcare and early childhood education, strengthening literacy skills, supporting learning outside school, engaging families, and equipping youth for jobs and secondary education.

“Young Men United has helped me to be more responsible and to be a better leader and role model,”

said Tylige, a South Carolina teen who is part of the Young Men United program, which supports college-capable young men of color.

HEALTHY COMMUNITY

We’re improving health and well-being by combating hunger in innovative ways, getting more people access to quality health care, improving maternal and child health, boosting support for mental health and substance misuse, and more.

United Way’s Ride United program has delivered 22M+ meals, food pantry deliveries and essentials to 129,000+ families.

FINANCIAL SECURITY

We’re turning the financial tightrope to a stable path that can lead to economic security for individuals and their families through housing and homeownership, financial coaching, job training and re-training, free tax preparation, and small business support.

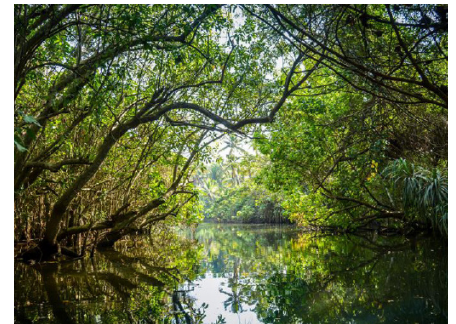

“The thing I love the most about my position is being able to help people move from struggle to success,”

said Ashley Strozier, who provides financial coaching to help families strengthen their economic situation at a United Way program in Detroit.

COMMUNITY RESILIENCY

We’re addressing urgent needs today for a better tomorrow by providing disaster relief and recovery, emergency preparedness, crisis hotline support, and environmental stewardship and sustainability.

Through the Mission Mangroves campaign, United Way and its partners in Mumbai have greened 33 hectares (81 acres) of degraded wetlands by planting 1.49M mangrove saplings.
